Under such conditions, since June last a good amount of orders have been placed with with the latter, the quantity thus contracted being estimated to reach about 60,000 tons. It is expected that the consumption of sulphate of ammonia this season would reach about 200,000 tons. And, so Japan must buy a great deal more from America, since Great Britain has no more available goods for delivery within the year. THE UTAH-SALDURO COMPANY Because of the unsettled potash market, the Utah-Salduro Company, Salt Lake City, Utah, have delayed the starting up of their refining mill. This company produces potash by means of solar evaporation. During the summer months, with the aid of the sun, they make their raw material in the form of a low-grade potash salt. The refining mill ordinarily would have started up September 1st to convert this low-grade material into high-grade muriate, analyzing about 90 per cent, potassium chloride. This plant produced more potash in 1920 than any other American potash plant. They hope that conditions in the market will soon improve to the point where it will warrant the operation of their refining mill. MARYLAND FERTILIZER BULLETIN The University of Maryland, Department of Chemistry, have just issued their quarterly bulletin, giving fertilizer analyses from February, 1921, to July, 1921. Over 500 analyses were made, the majority of the samples analyzed being obtained by sampling agents of the State, the samples being taken...
