

Pediatrics, Vol. 2: A Semi-Monthly Journal Devoted to the Study of Disease in Infants and Children; July 1st to December 15th, 1896 (Classic Reprint) (Paperback)

By George Carpenter

Forgotten Books, United States, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Pediatrics, Vol. 2: A Semi-Monthly Journal Devoted to the Study of Disease in Infants and Children; July 1st to December 15th, 1896 Faeces are passed entirely through the opening in the tumor which leads into the upper portion of the bowel. The lower portion of the bowel becomes atrophied from disuse. Operative treatment might be successful if undertaken early. Otherwise it is extremely difficult and probably impossible. The tumor is formed by prolapse of the anterior or proximal walls of the bowel through a short widely open diverticulum. Either the lower or the upper wall of the bowel may project. There is no obstruction of the intestine, and faeces are passed per anum. Operative treatment would be probably successful if under taken early.
