Young people will love conducting science experiments to solve an out-of-this-world mystery! For ages: 9 to 90. THE STORY BEGINS in Golden Gate Park, where chasing a stray dog leads three teenagers, Watson, Crick, and Rosa, on the adventure of a lifetime. The clever canine tricks them into entering a forgotten gateway to the land of Gaia. There, they discover a wondrous world filled with majestic griffins, squabbling shell-less turtles, giant carnivorous plants and mischievous long-nosed snodlops. The three teenagers soon realize they were summoned to solve a crime that if they don't solve will leave them stranded on Gaia forever. Time is critical, and they're running out of it! READERS WILL HAVE FUN solving the crime by conducting safe, simple, science experiments, using common everyday objects. The characters in the book make science easy by describing, in detail, how to perform the experiments, as well as the scientific concepts behind them. Once the reader has completed all the experiments, he or she will have enough evidence to know who-did-it. Instructions for five forensic science experiments are included in the book.
