## LIGHT SCATTERING BY PARTICLES, BREMEN WORKSHOP 2017

DOWNLOAD

Epubli Sep 2017, 2017. Taschenbuch. Condition: Neu. Neuware - The papers collected in this volume explore the current state of light scattering by particles as it developed in recent years. They represent a selection of the presentations held during the Bremen Workshop on Light Scattering 2017, which the Institut für Werkstofftechnik hosted and which was organized on the University of Bremen Campus in Bremen in March 2017. Over the years, this workshop became a regular institution with participants not only from Germany but also from all over the world. Actually, this year there were again over 30 participants from 11 different countries. During this year's workshop, various theoretical and practical aspects of light scattering by particles were discussed. The papers collected in this volume demonstrate the wide interdisciplinary nature of the interest in light scattering by particles and particle aggregates. Especially various theoretical aspects were extensively discussed such as Non-Local Optical Response, digital inline holography and Light Scattering by Oblate Particles near an Interface. The theoretical approaches used to simulate and investigate the mentioned practical problems include the T-Matrix Method, the Discrete Sources Method, the Discrete Dipole Approximation, the Discontinuous Galerkin Time Domain and the Hydrodynamic Method. 120 pp. Englisch.
